

CMA Part 1 - CAIRA Use Cases

AI Workflows & Agents

for Reporting, Planning & Performance

Lease Classification & Disclosure Agent

Classify ASC 842 leases, compute ROU assets and draft footnote disclosures

Revenue Recognition 5-Step Engine

Walk contracts through ASC 606 five-step model and generate revenue entries

Driver-Based Rolling Forecast Agent

Build rolling forecasts driven by volume, price and cost levers across business units

Zero-Based Budget Builder Workflow

Reset cost-center budgets from zero each cycle and route justifications for approval

Scenario & Sensitivity Forecast Dashboard

Compare best, base and worst-case forecasts across volume, price and cost drivers live

Flexible Budget Variance Agent

Decompose price, volume & mix variances and narrate root causes for managers

Balanced Scorecard & Strategy Map Dashboard

Convert enterprise KPIs into a live four-perspective scorecard with strategy-map logic

Responsibility Center Performance Workflow

Route segment P&Ls and variance commentary to cost-center owners weekly

and many more

CMA Part 1 - CAIRA Use Cases

AI Workflows & Agents

for Cost, Controls & Analytics

Activity-Based Costing Allocation Engine

Model activities, cost pools and drivers to produce ABC-based product margins

Standard Cost Variance Workflow

Capture material, labor and overhead variances and trigger corrective tickets

Joint & By-Product Cost Allocator

Split joint costs across products using NRV, sales-value and physical-units methods

SOX Control Testing Workflow

Schedule control owner attestations and route exceptions to internal audit each quarter

Segregation of Duties Conflict Agent

Scan ERP role assignments and flag SoD conflicts with remediation paths

Fraud Anomaly Detection Dashboard

Surface duplicate payments, weekend postings and thresholdadjacent invoices in real time

Data Lineage & Quality Copilot

Trace KPI lineage to source systems and explain data quality issues to finance users

Predictive AR Collections Dashboard

Score customer accounts by payment risk and prioritize collections actions weekly

and many more

CMA Part 2 - CAIRA Use Cases

AI Workflows & Agents

for Financial Analysis & Capital Decisions

Working Capital Optimization Dashboard

Compute liquidity, leverage, activity and profitability ratios with peer comparison and trend bands

Earnings Quality Red Flag Workflow

Scan filings nightly, flag accrual anomalies and route findings to the controller

Cash Flow Decomposition Dashboard

Split operating, investing and financing flows with quality-of-earnings overlays by quarter

WACC & Cost-of-Capital Calculator Agent

Derive WACC from market data, beta and target capital structure on demand

Incremental Cash Flow Agent

Track DSO, DIO and DPO levers and quantify cash-release opportunities by unit

Lockbox & Cash Positioning Optimizer

Evaluate lockbox, concentration banking and compensating-balance trade-offs

CVP & Breakeven Modeling Engine

Compute breakeven, margin of safety and operating leverage across products and segments

Pricing & Special-Order Advisor

Recommend bid prices using relevant cost analysis, capacity constraints & target margin

and many more

CMA Part 2 - CAIRA Use Cases

AI Workflows & Agents

for Strategic Decisions, Risk & Ethics

Make-or-Buy Decision Engine

Isolate relevant costs and qualitative factors before recommending in-house or outsource action

Transfer Pricing Policy Workflow

Apply intercompany pricing rules and route approvals through tax and treasury controllers

Risk Register Agent

Capture, classify and maintain a live enterprise risk register with owner assignments

Value-at-Risk & Earnings-at-Risk Dashboard

Model exposure across FX, interest-rate & commodity risks with stress-test overlays

NPV & IRR Capital Project Engine

Rank capital projects on NPV, IRR and payback with full sensitivity and scenario bands

Capital Project Approval Workflow

Route capex requests through hurdle-rate gates and CFO approval thresholds automatically

IMA Ethics Decision Advisor

Guide finance professionals through ethics dilemmas using IMA principles and standards

Whistleblower Intake & Triage Workflow

Capture ethics complaints anonymously and route them to the audit committee securely

and many more
